

# 12v outdoor battery cabinet capacity

## WORKING PRINCIPLE

## Overview

---

What is an outdoor Battery Cabinet?

HindlePower's Outdoor Battery Cabinet is constructed of extremely durable injected foam panels that achieve a level of thermal performance not previously seen in traditional battery cabinets. Feel confident your batteries will maintain 65°F for outdoor ambient temperatures down to -40°F and 77°F for outdoor ambient temperatures to 122°F.

What is a battery cabinet?

Equipped with the HindleHealth System, the Battery Cabinet will keep your battery at the ideal temperature in the most extreme of environments, giving you peace mind. HindlePower's Outdoor Battery Cabinet takes a proactive approach to hydrogen mitigation.

What temperature will my outdoor Battery Cabinet maintain?

Feel confident your batteries will maintain 65°F for outdoor ambient temperatures down to -40°F and 77°F for outdoor ambient temperatures to 122°F. Take a look at our 3rd party test data [here](#) to view it yourself. HindlePower's Outdoor Battery Cabinet is certified to IBC 2012, CBC 2013, and IEEE 693 to the highest levels.

How does hindlepower's outdoor battery cabinet work?

HindlePower's Outdoor Battery Cabinet takes a proactive approach to hydrogen mitigation. Rather than using a monitor to alarm when the amount of hydrogen exceeds the lower explosive limit, the Cabinet purges the air based on battery Ah capacity and technology based on the guidelines set forth in IEEE 1635.

How much battery capacity do I Need?

For example, if your daily power consumption is 10kWh and you want a backup power option for three days, the total battery capacity required would

be 30kWh. It is important to note that battery systems are not 100% efficient, so it is recommended to add a safety margin of around 20% to the calculated total battery capacity.

How do I calculate battery capacity for my off-grid cabin?

Before you can calculate the battery capacity required for your off-grid cabin, you need to understand your power consumption. This involves identifying all the appliances you will be using and determining their power ratings, as well as tracking the daily usage hours for each appliance.
