

3 billion investment in battery cells and energy storage projects

Overview

— As part of the Biden-Harris Administration's Investing in America agenda, the U.S. Department of Energy (DOE) today announced over \$3 billion for 25 selected projects across 14 states to boost the domestic production of advanced batteries and battery materials nationwide. Which battery technology projects will receive \$3 billion in federal funding?

The Biden administration has selected 25 battery technology projects to receive \$3 billion in federal funding. These projects cover various aspects of battery production, including mineral extraction and refining, battery recycling, and battery materials manufacturing.

How much money does the US invest in battery production?

This new round of funding brings the total U.S. investment in domestic battery and critical mineral supply chains to nearly \$35 billion, according to Brainard. Projects range from lithium mining in Nevada and North Carolina to battery factories in Michigan and Ohio, and the production of rare earth elements and magnets in California and Texas.

How much money does the Biden administration give a battery company?

The Biden administration is awarding over \$3 billion to U.S. companies to boost domestic production of advanced batteries. This funding marks the second round of grants under the bipartisan infrastructure law passed in 2021. Previously, \$1.8 billion was allocated for 14 projects.

How much money will the Biden-Harris administration give to battery companies?

U.S. To Supercharge Battery Production With New \$3 Billion Push U.S. To Supercharge Battery Production With New \$3 Billion Push Check out what the 25 battery companies will do with millions of dollars of federal grants. The Biden-Harris administration today announced an additional \$3 billion to boost America's battery production.

How much money will the doe provide for advanced batteries?

The U.S. Department of Energy (DOE) today issued two notices of intent to provide \$2.91 billion to boost production of the advanced batteries that are critical to rapidly growing clean energy industries of the future.

How will the \$3 billion eV & energy storage grants work?

The \$3 billion in grants for these new projects will help expand EV and energy storage production while reducing reliance on foreign supply chains, particularly China's. Furthermore, the selected projects will be administered by the U.S. DOE's Office of Manufacturing and Energy Supply Chains (MESC). The main goals of the funding are:
