

30KW emergency energy storage power station

Overview

What is an Eves 3030 EV charging station?

The EVES series of off-grid, mobile EV charging stations provide an innovative solution to charge electric vehicles anytime, anywhere. The EVES-3030 combines 30kW DC fast charging output power with a 30kWh lithium battery pack enabling true off-grid EV charging.

What is a voltstack 30K?

The Voltstack 30k is a towable battery electric energy storage system or hybrid energy system with an impressive 30 kW power output and an 80 kWh battery capacity.

How does the eves-3030 work?

The EVES-3030 combines 30kW DC fast charging output power with a 30kWh lithium battery pack enabling true off-grid EV charging. The EVES-3030 can be configured to your exact requirements, whether for power input to match the grid connection in your country or the charging protocols on the output with CCS, NACS, CHAdeMO, and GB/T options available.

How does the voltstack 30K electric generator work?

Seamlessly integrate the 30k electric generator with our proprietary software, NeuronOS™ to effortlessly track, analyze, and optimize energy consumption in real-time. The Voltstack 30k's smart hybrid technology automatically engages a diesel generator when the battery reaches a low charge state.

How does a 30K electric generator work?

The 30k operates silently without disturbing your surroundings or compromising on comfort. The 30k is essentially a mini-powerplant on wheels. Its towable design allows for easy transportation to different locations. Don't let power limitations hold you back. Experience the true potential of your projects with the 30k electric generator.

30KW emergency energy storage power station

30kW Solar Diesel Hybrid Power Station, Mobile

New Mobile Hybrid Generator, combines solar lithium battery storage and a diesel generator to provide nearly unlimited power at your job site, event, or emergency power during a major ...
