

# **35kw container power generation**

## Overview

---

### What is a 35 kW generator?

With its durable and powerful turbocharged diesel engine and skidded base, the 35 kW generator is an ideal power choice for mid-to-long-term operations. Features include: HDT's 35 kW skid-mounted generator has built-in two-stage 10 kW load banks, sheds on demand and eliminates wetstacking.

### What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

### What are factory-packaged containerized generator sets?

Our factory-packaged containerized generator sets are designed to address these challenges comprehensively. They offer a reduced footprint, improved ease of transportation and significantly shorter lead times.

### What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

### Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Why should you choose a containerized generator set?

Quicker startups for shorter deployment times. Robust Performance -Fully integrated containerized generator set is optimized for diverse critical power requirements regardless of environmental conditions.
