

5-cell lithium battery pack

Sample Order
UL/KC/CB/UN38.3/UL

Overview

What is a 5S LiPo battery?

If you're into RC vehicles, drones, or robotics, chances are you've come across the term 5S LiPo battery. But what exactly is it?

A 5S LiPo battery is a lithium polymer battery pack made up of five cells connected in series. Each cell contributes to the battery's total voltage and power. Why are these batteries so popular?

.

Which lithium ion batteries hold a higher voltage during discharge?

Ionic's lithium-ion batteries hold a higher voltage during discharge. We Could Design and Develop 18650 Lithium Ion Battery Pack According to your Product Work Performance & Structure Appearance. HIMAX, a leading manufacturer, 18650 lithium-ion battery packs with USB for optimal 5V rechargeable performance, tailored to your needs.

What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.

What is the internal resistance of a 5S LiPo battery?

Internal resistance is a measure of how easily energy flows through the battery. Lower resistance means better performance. Most 5S LiPo batteries have an internal resistance of 1-10 milliohms per cell. Why does this matter?

Low resistance ensures efficient energy transfer and minimal heat buildup.

What is a good rating for a 5S LiPo battery?

Common ratings for 5S LiPo batteries are 1-10C, 20C, 30C, 50C, or higher. Here's why it's important: A higher C rating means the battery can handle more intense power demands. However, it also drains the battery faster and can lead to more heat generation.

Are lithium ion batteries safe?

Ionic's lithium-ion batteries have 1/3 the internal resistance of a similar capacity lead-acid battery and they can be safely discharged to 90% DOD. Lead-acid internal resistance rises as they are discharged; the actual capacity which can be used may be as little as 20% of the mfg. rating.

5-cell lithium battery pack

51.2V 300AH

Buy 5S LiPo Battery , 5 cell LiPo Battery at affordable Price

At RCBattery, we understand that matching your RC device with a suitable LiPo battery is essential to enhance its performance and extend its durability and longevity. Thus, our experts ...
