

# **5g base station 100 000 charging piles**

## Overview

---

What is Jiangsu's first 5G+ smart charging pile?

On March 4th, Jiangsu's first "5G+ Smart Charging Pile" was put into operation at a Fast Charging Station of Yangzhou, Jiangsu. The charging pile integrates car charging, 5G micro-station, smart lighting and video surveillance into one.

What is a charging pile?

The charging pile integrates car charging, 5G micro-station, smart lighting and video surveillance into one. It functions as a multi-purpose pile which effectively saves land resources, reduces construction costs, and facilitates the construction of new infrastructure in smart cities.

How much power does a 5G base station use?

Each nation has a different 5G strategy. For 5G, China uses 3.5GHz as the frequency. Then, a 5G base station resembles a 4G system, but it's on a much larger scale. For sub-6GHz in 5G, let's say you have a macro base station. The power levels at the antenna range from 40 watts, 80 watts or 100 watts.
