

A company in the Republic of South Africa that produces batteries for communication base stations

Overview

Who are the leading battery manufacturers in South Africa?

There are profiles of nine companies including Eveready, the only primary battery manufacturer in South Africa and other major brands such as Energizer and Duracell.

Where do South Africa's battery cells come from?

South Africa has no battery cell manufacturing capability, so local assemblers must import this component from countries like China, which have established strong supply chains for critical cell minerals such as lithium, cobalt, nickel, and manganese.

How many people work at South Africa's battery plant?

However, the facility is capable of manufacturing up to 3.5GWh capacity in a year, the most of any battery assembly plant in South Africa. There are roughly 340 employees at the plant working across its various operations — including cell welding, battery assembly, research and design, and troubleshooting and repairs.

Who makes pillar batteries in South Africa?

In 1987, the company's Port Elizabeth production facility became the first in South Africa to be awarded the SABS Quality Management System for battery manufacturing. Since then, both pillar brands, Willard® and SABAT®, carry the SABS Mark of Approval.

Does ATC Africa have a lithium-ion battery bulk purchase agreement?

After having been strategic partners since 2017, ATC Africa signed a multimillion-dollar lithium-ion battery bulk purchase agreement with Polarium in 2021, securing thousands of lithium-powered backup solutions for ATC Africa's markets over the coming years.

Who makes VARTA batteries in South Africa?

Manufactured by Clarios, the world's largest manufacturer of automotive batteries, this brand has extended its market presence in Africa through a partnership with AutoX, who is now the official distributor of VARTA® Batteries in South Africa.
