

# **Albania energy storage power supply direct sales price**

## Overview

---

How much gas will Albania consume in 2040?

According to the National Energy Strategy, annual gas consumption should reach 1.5 bcm by 2030 and 1.7 bcm in 2040. The Albania energy market report provides expert analysis of the energy market situation in Albania. The report includes energy updated data and graphs around all the energy sectors in Albania.

Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.

How is energy used in Albania?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Does Albania have a national strategy of energy?

Albania's Ministry of Energy recently launched an auction round for the construction of the country's first large-scale solar plant. The country also has a National Strategy of Energy, which aims to develop an effective energy sector that guarantees security.

When will Albania open a day-ahead electricity market?

day-ahead electricity market was launched by the power exchange ALPEX in April 2023. Albania should proceed with the opening of the intraday electricity market along with the transposition and implementation of the Electricity Integration Package as a precondition for market coupling.

What should Albania do about electricity market coupling?

Albania should proceed with the opening of the intraday electricity market along with the transposition and implementation of the Electricity Integration Package as a precondition for market coupling. Albania should implement the certification conditions for Albgaz to make it an operational gas transmission system operator.
