

# **All base stations of China Communications**

## Overview

---

How many 5G base stations does China have?

For comparison, in November 2021, Xie Cun, director of the Information and Communication Development Department of the Ministry of Industry and Information Technology, said that at present, China has built more than 1.15 million 5G base stations. This accounts for more than 70% of the world's total.

How many 5G networks are there in China?

So far, more than 2,300 5G industry virtual private networks have been built and commercialized in China. As of the end of November 2021, the total number of mobile phone users of the three basic telecommunications companies in China is 1.642 billion. Out of this number, 497 million were connected to 5G mobile terminals.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.
