

And the total number of 5G base stations

Overview

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Who are 5G base stations suppliers?

Suppliers of 5G base stations were benefited from the rapid development of 5G technology. Huawei, Ericsson, Nokia, ZTE, and Samsung are among the world's leading suppliers. In 2024, these five vendors control almost 96.12 % of the global market. China has installed around 12 times as many 5G base stations as the United States.

What is the global 5G base station market report?

The global 5G Base Station market report is a comprehensive analysis of the industry, market, and key players. The report has covered the market by demand and supply-side by segments. The global 5G Base Station report also provides trends by market segments, technology, and investment with a competitive landscape.

Where is the 5G base station market located?

North America represents a significant market for 5G base stations, commanding approximately 22% of the global market share in 2024. The region's strong position is driven by extensive 5G infrastructure deployments across the United States and Canada, supported by robust telecommunications infrastructure and high consumer adoption rates.

Which segment dominates the 5G base station market in 2024?

The industrial segment maintains its dominance in the global 5G base station

market, commanding approximately 27% market share in 2024. This significant market position is driven by the accelerating adoption of Industry 4.0 initiatives and the growing integration of IoT devices in manufacturing facilities.

How many base stations will 5G have in 2025?

The U.S. has ambitious plans for 5G expansion, aiming to have more than 300,000 active base stations by 2025. This goal is being driven by investment from private telecom providers and government initiatives like the Rural 5G Fund. For businesses in the U.S., this means increasing access to high-speed connectivity.
