

Are there any solar power generators for home use in Georgia

Overview

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.

Will solar power fill my home's energy needs?

The Department of Energy says most homes with solar panels get at least 40% of their energy from solar; that varies by house. Whether solar power will fill all your power needs depends on how much your system produces and how much you use.

Can I use solar power for my home?

If you want to use solar power for your home, you have options. You may be able to buy or lease a system or sign a power purchase agreement. Your choice can affect how much you spend up front and over the life of the system, whether you get certain tax breaks or not, and your responsibilities when you sell your home.

Are solar panels a good option?

Solar power options If you use a solar panel system — also called a photovoltaic or PV system — to produce electricity, you buy less electricity

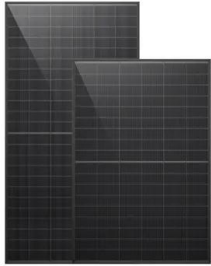

from the utility company and enjoy the benefits of renewable energy. The Department of Energy says most homes with solar panels get at least 40% of their energy from solar; that varies by house.

How much power do you get from a solar panel system?

The amount of power you get from a solar panel system depends on: Contact your utility to see what arrangements it makes with homeowners who produce solar power. Your utility may use “net metering,” which pays you or gives you credit for excess power your system produces during the day and returns to the grid.
