

# Argentina Network Outdoor Base Station

## Overview

---

The observatory is located north of , near the on provincial route 33, in the so-called Pampa de Pilmatué, in the deserts of . The station is based on a two-square-kilometer plot and houses a 35-meter antenna. It is the first Chinese deep space earth station built outside . The land was leased in 2012 to the Chinese government for 50 years of use, and the agreement includes a tax exemption.

What is an outdoor compact base station?

**Outdoor compact base stations** These base stations are designed for installation in any type of outdoor scenario. They offer a high degree of IP protection, which allows them to operate in the most adverse conditions (rain, extreme heat, wind, humidity, saline environments. ) without requiring an additional mechanical cover.

What is an indoor base station?

**Indoor base stations in rack format** This is the most common type of base station, in which all its components are integrated in a rack-type cabinet, which provides more space for more modules or components. This can enable, for example, redundancy of all components, thereby improving system availability.

What is the TP-Link outdoor wireless base station?

The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users. Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas.

Can a small outdoor base station match a rack-mount base station?

Thus, by adopting new signal processing techniques such as SDR (Software Defined Radio), small outdoor base stations have been able to match the performance of rack-mount base stations. Transportable base stations
