

BMS battery management control system

Overview

A battery management system (BMS) is any electronic system that manages a rechargeable battery (cell or battery pack) by facilitating the safe usage and a long life of the battery in practical scenarios while monitoring and estimating its various states (such as state of health and state of charge), calculating.

MonitorA BMS may monitor the state of the battery as represented by various items, such as: .

BMS technology varies in complexity and performance: • Simple passive regulators achieve balancing across batteries or cells by bypassing the.
