

# **Bahrain Solar Power Generation System**

## Overview

---

With 8,000 “Canadian” type solar panels and 28 ABB inverters, it will have a capacity to produce 5,366 GWh per year. Bahrain gets some of the world's highest levels of sun radiation. Given the abundance of sunlight in the kingdom, the country is focusing on producing solar electricity.

## Bahrain Solar Power Generation System

---

### [Lakeland Electric to test new liquid nitrogen power generation system](#)

The system uses temperature differences between liquid nitrogen and a solar-fed heat source to spin the engines. It'll be the first time it's used on a utility scale.
