

British bifacial solar panel manufacturers

Overview

Who makes bifacial solar panels in the UK?

There are a small handful of manufacturers that currently have bifacial solar panels in the UK market. Current Bifacial manufacturers include: LG, Canadian Solar, Longi, Trina Solar, and Yingli Solar. However, with increasing popularity we expect this to rise as bifacial modules become more mainstream.

What are UK solar power bifacial modules?

UK Solar power bifacial modules are designed to perform to the highest British standards to deliver up to 22.5% efficiency with British guarantees of 30 years you can trust. Latest superior technology to collect energy from the front and rear side of the panel. 30 years Performance warranty. 12 years double backed Material & workmanship warranty.

Why should you choose bifacial solar panels in the UK?

ESE Solar offers a selection of bifacial solar panels to the UK market that comes with competitive pricing, excellent product specifications, and reliable installation services. As the world continues to shift towards sustainable energy, choose bifacial panels to help you play your part in the world's transition towards a greener future.

How much does a bifacial solar system cost?

Bifacial panels have transparent front and back sides that can both capture solar energy for your home. The average 4kW bifacial system will cost £5,500 - £6,600, and could save you £860 per year on your electricity bills. Bifacial panels are highly efficient at capturing solar energy, potentially increasing your solar panels' output by up to 30%.

When did bifacial solar panels come out?

The technology behind bifacial solar modules has been around since the 1960s. However, it wasn't until the early 2000s that they started gaining

traction in the solar industry. The first commercial bifacial solar panel was developed by SunPower Corporation in 2010. Since then, we have seen a substantial growth in bifacial solar panel manufacturers.

How much do bifacial panels cost in the UK?

For the average home in the UK, bifacial panels in the UK tend to cost between £9,900 - £11,000, including installation. Generally, because of their advanced design and specialised equipment, bifacial panels prices are around 10% higher than the cost of solar panels with a monofacial design.
