

Can containers be used for mobile power generation

Overview

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary power solutions. These stations can also be easily transported to different locations as needed. Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

Why should I build a container for my portable generator?

Here are some of the best reasons for building a container for your portable generator. Weather: An enclosure protects your generator from weather conditions such as rain, snow, freezing temperatures, and high winds. Not only can harsh weather ruin a generator, but it can void your warranty, too.

What is a mobile power station?

The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require with fuel and are noisy, this mobile power station uses solar energy with no noise pollution.
