

# **China s solar base station charging pile ranking**

## Overview

---

How much electricity do China's public charging piles provide?

In August, China's public charging piles provided about 3.26 billion kWh of electricity, up 39.8 percent year-on-year and essentially unchanged from July. The most charged vehicles were buses and passenger cars, with other types of vehicles such as sanitation and logistics vehicles and cabs accounting for a smaller share.

Where does China's charging infrastructure rank?

Star Charge is in second place with 408,000 units, YKC Charging is in third place with 379,000 units, and State Grid is in fourth place with 196,000 units. From January to August, China's charging infrastructure increased by 2 million units, of which 474,000 were public charging piles and 1.524 million were private charging piles.

How will China's new energy vehicle sales compare with new charging infrastructure?

From January to August, China's new energy vehicle (NEV) sales amounted to 5.37 million units, which is 2.7 times the number of new charging infrastructure. The construction of charging infrastructure can basically meet the rapid development of NEVs, the EVCIPA said.

Which operator has the most public charging piles?

Teld is the operator with the largest number of public charging piles, with 451,000 units as of August. Star Charge is in second place with 408,000 units, YKC Charging is in third place with 379,000 units, and State Grid is in fourth place with 196,000 units.
