

Containerized power generation applications

Overview

What are containerized generator / packaged container and enclosure options?

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

Why are containerized gensets important?

It also protects against theft and vandalism. Chinese manufacturers, exporters, and suppliers are major players in the global market for containerized gensets. With advanced engineering capabilities and competitive pricing, China factories offer a wide range of models for different power capacities and fuel types.

What is unified power genset?

Unified Power offers containerized generator sets with CHP and Emission control system. Leveraging the expertise acquired during several years of manufacturing CHP/ CCHP Modular containerized gas power solutions. With our genset containers offer optimal performance in various site conditions.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application

(power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Why do you need a pre-packaged generator?

Pre-packaged containers and enclosures can simplify and expedite installation time, provide sound attenuation and personnel protection inside buildings, and provide weather protection for outside installations. Unified Power offers containerized generator sets with CHP and Emission control system.

Containerized power generation applications

WO2011099668A1

The present invention relates to a containerized power plant, and particularly, to a containerized power plant consisting of a plurality of containerized power generation units and a main control ...
