

Croatian Power Generation Container Company

Overview

Who owns a power station in Croatia?

All power stations in Croatia are owned and operated by Hrvatska elektroprivreda (HEP), the national power company. As of 2015, HEP operates 26 hydroelectric, 4 thermal and 3 cogenerating power plants with the total installed electrical power of 3.654 MW.

What is a Croatian power system?

The Croatian power system comprises plants and facilities for electricity production, transmission and distribution in the territory of the Republic of Croatia.

How many hydropower plants are there in Croatia?

Croatia has 28 hydropower plants of which 2 are reversible, 2 small size and 1 pumped storage. They are distributed in three production areas: North, West and South with one independent plant, and are HEP's most important source of renewable energy.

Does Croatia have a nuclear power plant?

Croatia has no nuclear power plants on its territory, but co-owns the Krško Nuclear Power Plant together with Slovenia. The Krško plant was built in the era of Yugoslavia on the territory of present-day Slovenia. Planned decommissioning is by 2043. In 2014, HEP built nine solar power plants on the roofs of business buildings.

Why is the Croatian power system interconnected with other countries?

For the security reasons, quality of supply and exchange of electricity, the Croatian power system is interconnected with the systems of neighboring countries and together with them it is connected into the synchronous network of continental Europe.

Is Croatian power system a transit system?

By reconnecting the UCTE synchronous zones 1 and 2, the Croatian power system has become a transit system again. The Croatian power system is a control area by HOPS. Together with the Slovenian power system and the power system of Bosnia and Herzegovina it constitutes the control block SLO – HR – BIH within the ENTSO-E association.
