**1-3MWh**

**BESS**

## Overview

---

What is a microinverter solar system?

Typically, microinverters are “distributed” inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.

What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different performance and characteristics.

Where are solar inverters located?

Microinverters are located on the roof near the solar panels, due to which these inverters are more efficient than string inverters when it comes to converting energy. Solar systems with microinverters can still generate electricity, even if one or two panels do not perform properly.

Where can I buy solar panels?

SOLSOL has been your reliable partner in solar energy since 2012. All orders are subject to the General Terms and Conditions. Copyright © 1996-2023, SOLSOL s.r.o. Buy photovoltaic panels, inverters, batteries, BESS and PV structures directly from SOLSOL. Professional B2B e-shop for partners with quick and easy ordering.

What are the different types of solar inverters?

There are mainly three types of solar inverters — string inverters, micro-inverters, and power optimizers. All these inverters have a different system. However, they have the same function, which is collecting DC power from batteries and convert into AC, though with different levels of efficiency.

What is a network photovoltaic inverter with data logger?

Network photovoltaic inverter with data logger. Robustní 3fázový střídač pro velké fotovoltaické systémy s výkonem 100.000 W. Verze D (decentralizovaný design) The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used.
