

Czech solar power inverter

Overview

Who makes solar panels & inverters?

The company SOLSOL s.r.o. has operated on the Czech market since 2012. It deals with the wholesale of solar panels and inverters. Since 2013, it has been an exclusive partner of the Taiwanese company AUO (formerly BenQ), which produces high-efficiency mono-photovoltaic modules at a plant in Brno with the capacity of 200 MWp/year.

What is the future of solar energy in Czech Republic?

In the 2021 Solar Conference, Industry and Trade Minister Karel Havlicek reveals that the future is bright for the solar energy market in Czech Republic. The country plans to move away from coal as its main power source and they are looking at renewable sources as a viable option for replacement.

What makes Czech Republic a great country for solar energy?

There is a long list of solar energy equipment manufacturers and suppliers in Czech Republic. This makes it possible for the country to have a high share of the renewable energy market in Europe and worldwide. In fact, some of the biggest manufacturers and producers of solar panels and technology are serving the Czech market.

What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different performance and characteristics.

How does a solar inverter work?

The inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. It monitors the performance of solar panels, important network parameters and values,

ensuring high yields and safety of the photovoltaic system.

What is a network photovoltaic inverter with data logger?

Network photovoltaic inverter with data logger. Robustní 3fázový střídač pro velké fotovoltaické systémy s výkonem 100.000 W. Verze D (decentralizovaný design) The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used.
