

Côte d'Ivoire Energy Storage Industrial Park

Overview

Does Côte d'Ivoire have hydropower?

As of 2023, hydropower in Côte d'Ivoire accounted for about 30% of electricity generation. Although periods of severe drought sometimes lead to interruptions in supply, the realization of untapped hydropotential could be a cornerstone for the development of the energy sector. Table 2. Renewable energy resources of Côte d'Ivoire.

Where is solar energy available in Côte d'Ivoire?

Côte d'Ivoire has several areas with great solar energy potential, with the highest DNI solar intensity reaching 5.7 kWh/m² per day recorded in the northwest part of country, between Denguele and Savanes districts. The strongest wind speeds of 4.0-5.0 m/s at 50 m are distributed in southern part of country, along coastline of the Gulf of Guinea.

Is Côte d'Ivoire a good place to invest in energy?

Côte d'Ivoire faces vast opportunities and serious risks as it approaches the global energy stage. With its natural wealth, the country stands to reshape its economy and become a significant player in energy and mining. However, success hinges on managing the environmental impact and avoiding the dangers of over-reliance on resources.

What is the production and consumption of fossil fuels in Côte d'Ivoire?

The Production and Consumption of fossil fuels in Côte d'Ivoire (left — coal, in the center — gas, right — oil) A great part of Ivorian primary energy demand is covered by domestic oil and natural gas production. Crude oil production, shown in the graph above, has decreased slightly over the ten years to 30.5 thousand barrels per day.

What is Côte d'Ivoire energy?

Côte d'Ivoire Energies (CI-ENERGIES): the state-owned entity responsible for

monitoring and managing the electricity system. It also manage projects for which the state acts as the conceding authority.

Does Côte d'Ivoire export electricity?

Côte d'Ivoire is the third largest electricity market in West Africa and has historically been a net exporter of electricity with 11.8% of its total electricity generation sold to Mali, Burkina Faso, and Ghana in 2019 (ANARE-CI, 2020).

2.1.2. Future cost assumptions Fig. 2 presents the long-term cost assumption for our analysis.
