

DaRan Portable Energy Storage

Overview

What is a daranener® portable power supply?

DaranEner® offers an array of portable power supply solutions, including solar generators, portable power stations & solar panels. These products will ensure you that you can always keep your devices charged when necessary.

Why should you choose daranener?

This can be attributed to the fact that DaranEner has its own factory and is committed to providing environmentally friendly products that are completely safe and practical for the environment. Inside the box, there are the power station, an MC4 to XT60 solar charging cable, an AC charging cable, and a USB-C cable.

Does daranener use a LiFePO4 battery?

Safety is a top priority for DaranEner, which is why the NEO2000 utilizes a LiFePO4 battery, known for its high level of safety. The company's dedication to quality control is evident in their low customer complaint rate of only 5%, which is significantly lower than the industry average.
