

# **East Asia Photovoltaic Energy Storage Plant**

## Overview

---

What is the largest floating solar power plant in Southeast Asia?

**Capacity: 192 MWp** The Cirata Floating Solar Power Plant, Southeast Asia's largest floating solar installation, is located on a 250-hectare area of the Cirata Reservoir in West Java, Indonesia. This 145 MW (192 MWp) facility is Masdar's first floating PV project and marks its entry into the Southeast Asian renewable energy market.

What percentage of Southeast Asia's energy capacity will be renewable?

Member countries aim to meet 35 percent of their energy capacity through renewables by 2025. Presently, ASEAN boasts 28 GW of large utility-scale solar and wind power, contributing 9 percent to the region's total electricity capacity. Solar photovoltaics (PV) play a pivotal role renewable energy revolution of Southeast Asia.

What is China Energy Construction - Terra photovoltaic storage project?

Recently, China Energy Construction Co., Ltd. has made another major breakthrough in the international new energy market, and successfully signed the largest EPC (design, procurement, construction) project of integrated photovoltaic and storage power station in Southeast Asia with Manila Electric Power Company - Terra photovoltaic storage project.

Is Southeast Asia a good place to invest in energy storage?

**Image: ACEN.** There has been an uptick in energy storage investment in Southeast Asia, a region still largely powered by coal and experiencing high growth in population and energy demand. Andy Colthorpe speaks with companies working to establish a framework of opportunities in the region.
