## Overview

---

What is a medium series battery energy storage system?

The medium series battery energy storage system is designed with versatility and scalability in mind. Featuring MPPT technology and leading-edge conversion equipment, these BESS systems are built to stand out thanks to their longevity, reliability, and customisability.

What is a commercial energy storage system?

The commercial energy storage utilizes a high-density LPF Battery, which is a type of Lithium-ion battery that uses iron phosphate as the cathode material. These commercial battery storage systems are known for high energy density, long life, and excellent performance at high temperatures.

What is a Bess battery?

The small BESS series is a fully integrated battery energy storage system that's built to last. The Series is both scalable and engineered for modularity with a low MTTR, making it ideal for medium renewable energy projects. It offers flexible and scalable designs for various applications, whether you need a small or medium energy storage solution.

What is the icon 100kW 215kwh battery storage system?

The iCON 100kW 215kWh Battery Storage System is a fully integrated, on or off grid battery solution that has liquid cooled battery storage (215kWh), inverter (100kW), temperature control and fire safety system all housed within a single outdoor rated IP55 cabinet.

What is a solar engery Battery Cabinet?

The solar engery battery cabinet was designed for battery installations, due to a cabinet of this design's scarce availability that was suitable for a variety of lithium-ion batteries. The solar battery equipment cabinets are made specifically for the solar industry with an aim to make installations safer and

easier for consumers.

Why should you choose a Bess energy storage system?

It offers flexible and scalable designs for various applications, whether you need a small or medium energy storage solution. Our BESS is modular, which means you can mix and match cabinets to suit your system requirements. Plus, it comes in two variants, AC Single Bay and AC Dual Bay.
