

Engineering inverter 48v universal 8kw

Overview

What is a 48 volt DC to 240 volt AC inverter charger?

AIMS Power's line of ETL listed to UL 1741 Standards inverter chargers is the power house for backup and off-grid systems. These inverter chargers have a 48 Volt DC input and perform with very little power loss, providing 120/240 Volt AC output.

What is the surge power of this inverter?

This inverter offers 36,000 watts of surge power for up to 20 seconds. The most common use for this inverter is emergency backup power for residences and businesses, providing up to 12,000 watts of continuous power (depending on model).

What is the AIMS Power inverter charger used for?

This 8kw 48 volt AIMS Power low frequency inverter charger is great for off-grid & emergency backup power. It is one of the most powerful split-phase inverters available on the market.

Why are 48 volt DC inverter chargers more efficient?

These inverter chargers are more efficient in large systems when compared to using inverters that accept 12 or 24 volts. Built with a 48 Volt DC input, they perform with very little power loss, making them an attractive feature for sustainability lovers looking to live as efficiently as possible.

What is the primary use of a power inverter?

The primary use of a power inverter like the 8000 watt inverter charger from AIMS Power is emergency backup power for residences and businesses. It provides access to up to 12,000 watts of continuous power and 36,000 watts of surge power for up to 20 seconds.
