

Estonia s new outdoor power supply

Overview

According to the International Energy Agency 's (IEA) 2023 Energy Policy Review for Estonia, the country is assessing the potential adoption of nuclear power into its energy portfolio, with a decision expected in 2024. Overview Estonia's electricity sector is interconnected with regional energy markets, particularly through connections with and . The direct electrical interconnection with Finland was established in 2006 and was further stre.

Electricity in 2020: • Usage - 9.17 billion kWh • Production - 5.9 billion kWh • Import - 7.37 billion kWh • Export - 3.72 billion kWh.

Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016. There is also some natural gas capacity, but no coal generation. The largest power complex in the country.
