

Finnish outdoor power supply company

Overview

In 2016 there has been renewed discussion about Finland's energy policy. Finland imports over 20% of the electricity used at peak usage. For example, in the hour between 17-18 on January 7, 2016, during a period of extreme cold, Finland imported 4,300 MW (28.5%) out of a record 15,100 MW of total usage (average over 1 hour). Multiple delays in the construction of the third reactor at the (1,600 MW) exacerbated the domestic energy production deficit.
