

# **Global base station communication share**

## Overview

---

What is the global 5G base station market report?

The global 5G Base Station market report is a comprehensive analysis of the industry, market, and key players. The report has covered the market by demand and supply-side by segments. The global 5G Base Station report also provides trends by market segments, technology, and investment with a competitive landscape.

What is the global base station antenna market size?

The global base station antenna market size was valued at USD 8.19 billion in 2022 and is projected to grow from USD 9.36 billion in 2023 to USD 28.15 billion by 2030, exhibiting a CAGR of 17.0% during the forecast period.

Who are 5G base stations suppliers?

Suppliers of 5G base stations were benefited from the rapid development of 5G technology. Huawei, Ericsson, Nokia, ZTE, and Samsung are among the world's leading suppliers. In 2024, these five vendors control almost 96.12 % of the global market. China has installed around 12 times as many 5G base stations as the United States.

What is the fastest growing segment in 5G base station market?

The 5G macro cell segment is emerging as the fastest-growing segment in the 5G base station market, projected to grow at approximately 40% during the forecast period 2024-2029.

Which region will dominate the 5G base station antenna market?

Asia Pacific is expected to dominate the market share during the forecast period. The increasing intensity of 5G rollouts across countries, such as China, South Korea, and Japan, is expected to drive the base station antenna demand in this region. China is expected to lead the market during the forecast period.

How many 5G base stations are there in China?

The market is witnessing significant developments in base station technology and deployment strategies. By September 2023, China had built 3.189 million 5G base stations, with 22.6 5G stations per 10,000 people, demonstrating the scale of infrastructure deployment possible.
