

Greek Industrial Energy Storage Solutions

Overview

Why is Greece focusing on energy storage?

Greece has been actively focusing on energy storage since the emergence of the RES “boom” in 2020. The country recognised the pivotal role of energy storage in the energy transition and emphasised its importance in the first iteration of the country’s National Energy and Climate Plan in 2019.

Why do we need cross-border transmission lines in Greece?

Additionally, developments of cross-border transmission lines support the EU Market integration as well as contribute to the security of supply. Greece, with its potential for renewable energy generation, can export clean energy to neighboring nations, contributing to regional sustainability goals and facilitate investments.

What percentage of Greek electricity consumption is residential?

Historically, residential and commercial-public sector comprise ~70% of total electricity consumption of Greek market. Electricity retail prices were historically consistent in the Greek market until 2021, with minor deviations in end-user prices year over year. upfront prices.

Is Res a good investment for the Greek economy?

An additional national economy surplus to generators as a result of the increased exporting activity Comparing the 3 scenarios, the results show that there is a huge financial potential for both end-customers and generators. Depending on the level of RES deployment the total benefit for the Greek economy varies from €6,2 to €17,5 billion.
