

Greek lithium battery battery pack

Overview

Where are lithium ion batteries made?

There will also be further expansion of the assembly plants in Verona, Italy and North Carolina, United States. The €20m for lithium-ion batteries will also see an assembly line for prototyping and R&D purposes alongside the three production lines for off-road mobility, industrial use, and Energy Storage for renewables.

How much money is being invested in lithium-ion batteries?

An additional €20m is being invested in the production of lithium-ion batteries, with the installation of three highly automated assembly lines for lithium modules and complete lithium battery systems, as well as one assembly line for prototyping and R&D purposes.

What will sunlight's lithium battery technology be used for?

A company spokesperson told Energy-Storage.news today that Sunlight wants the lithium battery technologies it develops to play a key role in areas including automated guided vehicles, electric buses and shipping, as well as in “smart storage systems for renewable energy sources”.

How much money does sunlight get for a lithium-ion battery project?

Image: SUNLIGHT. A €105 million (US\$127.6 million) push to develop low-cost, environmentally-friendly lithium-ion battery technology by Sunlight, a designer and manufacturer of batteries headquartered in Greece, will receive €49.9 million in grant funding.
