

Home stackable energy storage direct sales manufacturer

Overview

What is a solar stackable battery storage system?

Whether it is a small family home or a large villa, the solar stackable battery storage system can meet its power needs and is an advanced, efficient and environmentally friendly home energy battery storage solution. Diversified use scenarios of 51.2 v lithium ion battery, supporting off-grid and grid-connected switching.

What is a HomeGrid stack?

The HomeGrid Stack'd Series offers an ease-of-install, aesthetics, and performance that is unmatched in residential batteries. Each Stack is made of suitable for applications of high power, limited installation space, and restricted load-bearing and long cycle life.

How does the stack'd battery management system work?

The Stack'd Series has a built-in BMS battery management system, which can manage and monitor cell's information including voltage, current and temperature. What's more, the BMS can help extend the cycle life by balancing cells during charging and discharging.

How does Bess home energy storage battery work?

BESS Home Energy Storage Battery integrates seamlessly with our smart home technology. Through the BESS app, we can monitor our energy usage in real-time and make adjustments to optimize our consumption. We also receive alerts about our energy levels and battery status, so we're always in control.

Why should you choose Bess home energy storage battery OEM?

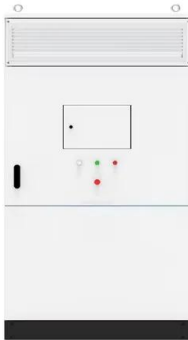

BESS Home Energy Storage Battery OEM allowed us to customize a solution that perfectly matched our business's energy profile. We can store energy during off-peak hours and use it during peak times, resulting in significant cost savings. This energy independence has been a game-changer for us, giving us

better control over our operational costs.
