

How about the new energy station

Overview

The Legend Power Station in Port Arthur and the Lone Star Power Station near Cleveland are expected to provide enough reliable energy to power more than 300,000 homes. Entergy said the facilities will help meet growing demand, strengthen grid reliability and reduce costs for customers. How much power will a new power station produce?

The two new power stations are expected to produce roughly 1,200 megawatts of power, or enough for 300,000 homes. (Rendering courtesy Entergy Texas).

Will Entergy build two new power stations in Southeast Texas?

(Rendering courtesy Entergy Texas) Entergy officially announced plans to construct two new power stations in Southeast Texas in a June 4 news release following studies that showed the need for a 40% increase in power generation to support the region.

When will Entergy power stations be built?

The plans for the power stations must be approved by the PUCT before construction can begin. In the release, Entergy officials said they anticipate having both power stations active by 2028, but the timeline could change depending on when Entergy receives authorization for the projects.

How much does it cost to build two power stations in Texas?

The two proposed power stations would cost approximately \$2.2 billion to build, according to a permit filed by Entergy with the Public Utility Commission of Texas. The announcement follows a May 30 news release from Entergy that described a need for an additional 1,600 megawatts of power generation by 2028 to keep up with existing demand.

How much power will Entergy Texas provide by 2028?

The announcement follows a May 30 news release from Entergy that

described a need for an additional 1,600 megawatts of power generation by 2028 to keep up with existing demand. The new stations proposed would provide roughly 1,200 megawatts of power generation across Entergy Texas' service area:.

How much power will enverus bring in the next 5 years?

Enverus now projects the next five years will bring roughly 46 gigawatts of gas-fired power online. That compares to 39 gigawatts in the past five years, it said. Entergy's Orange County Advanced Power Station, a 1,215-megawatt facility under construction, is shown Monday, Feb. 24, 2025, in Orange, Texas.
