

# **How long is the base station power supply life**

## Overview

---

How long does a portable power station last?

A portable power station's lifespan is largely determined by its battery cycle life. This means the amount of times it can be charged and recharged before capacity drops.

How long should a base station last?

Base Stations should have a very long life span, even if the power management modes we offer are not used, however. Using the power management features will increase the life span further by leaving the laser and/or rotor disabled (depending upon the mode) when inactive. Feel free to share this if you like.

How long does a battery last in a power station?

This means the amount of times it can be charged and recharged before capacity drops. Most modern power stations, including Pisen's models, use lithium batteries, which typically last hold 500 to 1,000 charge cycles (battery cycle life) before their capacity drops to around 80%.

How long does a power supply last?

Power supplies tend to be rated in "hours," so it goes without saying that those used continuously will have a shorter lifespan than those that are used only occasionally. PSUs for high-powered devices, such as servers or computer systems, will likely have a shorter lifespan than those used to power smaller devices given the higher load.

How long does a Pisen battery last?

Most modern power stations, including Pisen's models, use lithium batteries, which typically last hold 500 to 1,000 charge cycles (battery cycle life) before their capacity drops to around 80%. This is excellent news for those who need portable power because it suggests very effective longevity.

How many times a day should a base station be powered up?

If it depends on the usage, what is the estimated threshold (e.g. if the Base Stations are powered up 10 times a day it is better to keep them running instead). Please let me know if I can post your reply on Reddit to help other users as well. Thanks a lot! Steam Support response: Thanks for writing in with your questions.
