

How much does the Serbian energy storage power supply cost

Support any customization

Overview

Will Serbia be able to supply electricity at market prices?

For the first time, consumers in Serbia are to be supplied electricity at market prices by a non-state-owned supplier.

Does Serbia still use lignite?

Lignite still covers half of total energy consumption, despite the rising share of oil products. Many lignite-fired and hydropower projects remain on hold, despite new capacity needs. Serbia is developing new power and gas interconnections with neighbouring countries. The energy policy is a prerogative of the Ministry of Mining and Energy.

How much energy does the EU consume per capita?

Energy consumption per capita amounts to 2.4 toe (22% below the EU average in 2021), including 4 500 kWh of electricity (22% below the EU average, 2021). Total energy consumption grew by 3.7%/year between 2019 and 2021 to 16.5 Mtoe.
