

# How much is the subsidy for Malta's energy storage project

## Overview

---

With €10.3 million in funding, more people can benefit from PV systems and battery storage, enhancing energy efficiency and sustainability. What are Malta's feed-in tariffs & rebates?

Malta has extended its feed-in tariffs (FITs) and a rebate scheme to support the adoption of residential solar and battery energy storage systems for another year. The authorities will start accepting applicants for the two initiatives again from Feb. 23.

How much is REWS funding in Maltese?

The Maltese government is allocating €4.8 million to the scheme this year. The two subsidy programs will reopen for applications from Feb. 23. REWS is also accepting proposals from entrepreneurs that are looking to invest in the development of large renewable energy projects, such as solar farms and wind farms.

What percentage of PV installations are in Malta?

The government said it will provide further information on the bidding process in March. According to 2022 figures from Malta's National Statistics Office, residential PV installations accounted for 93.5% of Malta's total PV capacity, followed by the commercial and public sectors, which accounted for 5.7% and 0.8%, respectively.

Can I apply for a property grant in Malta?

The applicant is not entitled to receive a grant if the property is used principally for business purposes, including the letting of the property on a commercial basis (even if the tenants' use of the property will be residential); technology from any other schemes that include national or public funds such as Government of Malta funds.

What are the new PV tariff schemes?

These new schemes have been launched by the Minister for Energy, Enterprise and Sustainable Development, Miriam Dalli where she also announced that those domestic account holders of PV panel systems that had their Feed In Tariff contract expired in the past years, will be benefitting from an increased rate of 10c5 per kWh.

How much is a feed-in tariff for a photovoltaic system?

A second scheme is also being re-issued, offering a beneficial feed-in tariff for photovoltaic systems under 40kWp. The feed-in tariff is set at €0.15 per kWh for 20 years and does not include a grant. The application process is now simpler due to automatic approval of the first part of the application process.
