

How to connect the reserved power supply in the empty battery cabinet

Overview

How do I install a powerwarer 9315 cabinet?

Prepare the site for the cabinet installation. Inspect, unpack, and unload the cabinet. Create an installation plan for wiring the parallel cabinet to the corresponding UPS modules. Prepare for wiring. Complete the installation checklist from the PowerwareR 9315 Installation manual.

How much conduit do I need for A Powerware 9315?

The top entry connection requires installation of 1/2-in. flexible conduit within the UPS. Bottom entry connection requires no additional routing of conduit within the UPS. For UPS external wiring requirements, including minimum AWG size of external wiring, see the Powerware 9315 Installation manual provided with the UPS system.

How do I wire a paralle cabinet?

The power wiring for this equipment is rated at 75_C. If wire is run in an ambient temperature greater than 30_C, higher temperature and/or larger size wire may be necessary. Wiring for the paralle cabinet should be installed through the 28.6 mm (1.1 in.) knockout in the bottom of the UPS cabinet.

How do I install a parallel ups cabinet?

Use a forklift or pallet jack to move the packaged cabinet to the installation site, or as close as possible to the site, before unloading from the pallet. Prepare the site for the cabinet installation. Inspect, unpack, and unload the cabinet. Create an installation plan for wiring the parallel cabinet to the corresponding UPS modules.

How do I bypass a redundant inverter?

Turn the mode switch on both UPS modules to the Bypass position. The first module will shut off its inverter and the redundant module will transfer to Bypass. Turn the mode switch on both UPS modules to the Bypass position.

How do I bypass a redundant UPS module?

Turn the mode switch on both UPS modules to the Bypass position. After the first module shuts off and the redundant module is in Bypass, activate the start switch on the first module with the mode switch still in the Bypass position. Turn the mode switch on both modules to the Normal position. Activate the start switch on either UPS module.
