

How to prevent battery cabinet from tipping over

Overview

How do you prevent TV and furniture tip-overs?

Anchoring to prevent TV and furniture tip-overs is simple: Get it done fast. Get it done right. New Federal Rule to Prevent Furniture Tip-Over Injuries and Death; Effective September 1, 2023. What Does it Mean for Consumers?

[View and Print Tip Card Here](#). All you need are the right anchors and a few simple tools.

How do you prevent furniture from tipping?

The heavier the furniture, the more anchors you should use to prevent it from tipping. A resource list of recommended anchors can be found [at here](#). In dressers and other clothing-storage furniture, place heavier objects on the lowest shelves/drawers and lighter objects in higher ones.

How do you prevent a tip-over?

The only way to prevent a potentially deadly tip-over: properly secure furniture with drawers, doors, and shelves, TVs, and appliances to the wall. If you have furniture, a television, or an appliance in your home right now, you have something that could cause serious injuries or even death if it's not properly anchored to the wall.

What are the risks of tipping freestanding furniture?

The risks of tipping freestanding furniture are much more serious than most of us can imagine. The U.S. Consumer Product Safety Commission (CPSC) reports that furniture tip-overs are responsible for at least one child fatality in the United States every two weeks.

Should you anchor furniture to prevent tip-over accidents?

Anchor furniture to prevent tip-over accidents. The threat is serious, but the solution is simple! Every year, about 9 children under age 6 die when a chest

or dresser falls over on them, usually in their own bedroom. In more than half of these accidents, a TV also falls and is the primary cause of the fatality.

What happens if you don't tip your furniture?

Apart from physical harm, there is the potential for property damage, which can result in costly repairs, medical expenses, or lawsuits. Failing to secure heavy or tall furniture also poses a risk during earthquakes or other natural disasters. A lack of tip-over restraints may also cause a domino effect of more tipping.
