

How to use the new energy charging pile battery cabinet

Overview

What is a charging pile?

Charging pile is a device used to charge electric vehicles (EV). Its function is similar to that of a fuel dispenser in a gas station. It can charge various types of electric vehicles according to different voltage levels. It is an alternative of traditional gas station and gas pump.

Where can a charging pile be installed?

Charging piles can be installed on the ground or walls of public buildings and residential area parking lots or charging stations. What are the components of charging pile?

Electric vehicle charging piles are mainly composed of pile body, electrical module, metering module and other parts.

What are electric vehicle charging piles?

Electric vehicle charging piles are mainly composed of pile body, electrical module, metering module and other parts. Generally, it has functions such as energy metering, billing, communication, and control. The display screen in the charging pile can display important data such as charging amount, charging time, and cost.

How long does it take to build a charging pile?

To build a charging pile, the initial investment cost is low, the investment time is relatively small, and the occupied area is also small. Long charging time. Charging piles have always been regarded as the most standard energy supplement method for new energy vehicles. In slow charging mode, the charging process takes 6-8 hours.

How does a charging pile display work?

The display screen in the charging pile can display important data such as

charging amount, charging time, and cost. Consumers can use a specific charging card to swipe the card at the charging pile. What are the types of charging pile?

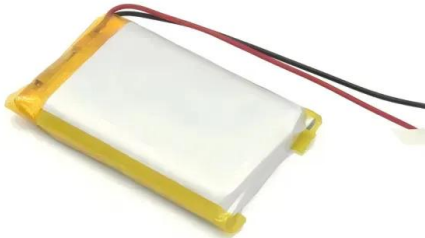

1. Different installation locations: public charging piles and charging piles built with the vehicle. 2.

How long does it take to charge a new energy car?

In slow charging mode, the charging process takes 6-8 hours. Battery life is reduced. The development of new energy vehicles has brought about the problem of battery life. Some new energy car owners can only choose fast charging at charging stations.
