

# Industrial Battery Energy Storage Sales

## Overview

---

The global Industrial Battery Energy Storage System market size was US\$ 22961 million in 2024 and is forecast to a readjusted size of US\$ 76478 million by 2031 with a CAGR of 18.0% during the forecast period 2025-2031. What is a battery energy storage system?

Battery energy storage systems (BESS) are rechargeable batteries that can store energy from different sources and discharge it when required. BESS consists of one or more batteries that can balance the electric grid, deliver backup power, and enhance grid stability.

What is the market share of battery energy storage systems in 2024?

By connection type, on-grid installations held a 78% share of the battery energy storage system market in 2024; off-grid applications are the fastest-growing segment at 18.5% CAGR. By component, battery packs, and racks represented 63% revenue share in 2024; energy-management software is advancing the fastest, at 20% CAGR.

What is a battery energy storage value chain?

In the U.S. market, the value chain is characterized by equipment suppliers, battery energy storage manufacturers, and end-use markets. Battery energy storage system utilizes batteries, module packs, connectors, cables, and bus bars as a part of the manufacturing process. Batteries form a major key component of battery energy storage systems.

Are batteries a key component of battery energy storage systems?

Batteries form a major key component of battery energy storage systems. Large-scale renewable energy installation in the U.S. economy will lead to enhanced deployment of battery energy storage systems in order to prevent intermittent power supply from renewable sources.

What are lithium-ion battery storage systems used for?

Lithium-ion battery storage systems are used in numerous areas including communication base stations, commercial and industrial buildings, grid frequency modulation, household energy storage, and smooth output of renewable energy.

What is storage battery manufacturing?

This U.S. industry comprises establishments primarily engaged in manufacturing storage batteries. NAICS Code 335911 - Storage Battery Manufacturing is a final level code of the “ Manufacturing ” Sector. There are 135 companies verified as active in this industry in the USA with an estimated employment of 24,462 people.

## Industrial Battery Energy Storage Sales
