

Inverter 5500 Photovoltaic

Overview

What is a 5500w solar hybrid inverter/charger?

This is a multi-function inverter/charger, 5500W Solar Hybrid Inverter Pure Sine Wave 48V 220VAC with Build In 100A MPPT Solar Charger, combining functions of inverter, solar charger and battery charger to offer uninterruptible power support with portable size. The following illustration shows basic application for this inverter/charger.

How many volts can a solar inverter handle?

It can handle solar arrays with a maximum of 5500W and a voltage range of 500V DC. Wide Application: It is suitable for all inductive loads, some motor-type loads, and half-wave loads. Battery management: This inverter is suitable for a 48V battery system and supports lead-acid batteries and water batteries.

How many output modes does a solar inverter have?

Additionally, it features four output modes: UTL, SOL, SBU, and SUB. As a UPS, it switches to backup power during outages, ensuring uninterrupted operation for your devices. Whether you're at home, in an RV, or enjoying outdoor camping, our 2-in-1 solar inverter charge controller is designed to meet your power needs.

What protection features does a hybrid solar inverter offer?

Multiple Protection Functions: Our off grid hybrid solar inverter comes equipped with a range of security features, including over-temperature protection, over-current protection, over-voltage protection, under-voltage protection, short circuit protection, and over-load protection.
