

Inverter Grid-Connected Ranking

Overview

Who makes the best solar string inverter?

We review the best grid-connect solar inverters from the worlds leading manufacturers Fronius, SMA, SolarEdge, Fimer, Sungrow, Huawei, Goodwe, Solis and many more to decide who offers the highest quality and most reliable solar string inverters for residential and commercial solar.

How do I choose the best solar inverter?

Choosing the best solar inverter comes down to efficiency, voltage performance, warranties, and price. We looked at all these factors in dozens of models featured on the EnergySage Marketplace to determine the best inverters of 2025. Five brands stood out: SolarEdge, Tigo, Enphase, Hoymiles, and Schneider Electric.

What is the best grid tie inverter?

When it comes to power, there is simply no stronger grid tie inverter out there than the SMA Sunny Boy 5000W inverter. At 5000W, this mammoth can handle just about anything your solar panels can throw at it, and shouldn't face any problems even during peak sunlight hours around midday.

Which inverter is best for your project?

These inverters hold the top spot with a 38% ranking in all project quotations. Huawei SUN -2000 100KTL and 300KTL are their most commonly used inverters coupled with Smartloggers. With a >0.5% failure rate, upgraded safety is offered. AI-powered arc-fault circuit interrupter (AFCI) reduces fire risk proactively.

What is an off-grid inverter?

Modern, off-grid inverters, or multi-mode inverters, can also be used to build advanced hybrid grid-tie energy storage systems. Many off-grid systems also use solar charge controllers (MPPTs), which are DC-coupled between the solar

panels and battery, to regulate the charging process and ensure the battery is not over-charged.

Are string solar inverters a good choice for utility-scale solar farms?

String solar inverters up to and above 100kW are also increasingly popular for utility-scale solar farms due to the advantages of string-level monitoring and ease of servicing compared to central inverters. Below is our list of the most popular 3-phase inverters on the Australian market in the 8kW to 30kW and 30kW to 100kW categories.
