

# **Inverter battery driven water pump inverter price**

## Overview

---

Which solar water pump inverter is available online?

The 5.5kW three-phase AC 220V solar pump inverter is now available online. This solar pumping inverter integrates advanced MPPT tracking for precise voltage detection and optimal performance. The solar water pumping system supports AC and DC input, with a DC voltage range of 300V~380V and a power factor  $>0.99$ .

Can a solar inverter drive a water pump?

Let's explore them. Three solar inverters can drive a water pump and convert photovoltaic direct current into alternating current. It is an inverter designed for running water pumps using solar power. It directly transforms the direct power produced by solar panels into an alternating current to drive the pump.

What is a solar pump inverter?

A solar pump inverter converts the DC power generated by solar panels into AC power suitable for driving a water pump. Easy to use and install. Affordable price 7.5 kW (10 hp) solar pump inverter for sale, AC output 17A at 3-phase, recommended DC MPPT range (350V, 750V), DC voltage (280V, 750V).

What is a 15 hp water pump solar inverter?

15hp water pump solar inverter with MPPT control, AC 25A output at 3-phase, rated power 11kW, and DC voltage range (280V, 750V). 15 hp solar pump inverter with RS485 communication and IP20 protection, supports AC and DC input, works at (-10°C, 40°C).

What is a water pump inverter?

It is a completely new inverter for water pumps, and the first residential water pump inverter solution in the Middle East and Africa. With the inverter technology, it Regulates pump speed for longer lifetime, highest and reduced maintenance costs. Over Voltage, Over Current and Over Temperature

protection.

### How to choose a solar pump inverter?

Understand the rated power of the water pump. Normally, the rated power of the solar pump inverter should be slightly more than or equal to the rated power of the water pump to ensure that the pump can be operated normally. For instance, if the water pump's rated power is 2kW, the selected inverter should have a rated power of 2kW or higher.

**Efficient**  
Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1500V
- 100% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Utilization
- Max. PV Input Current 10A, Compatible with High Power Modules

**Intelligent**  
Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart 1-10 Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type I SPD: prevent lightning damage
- Battery Reverse Connection Protection

**Flexible**  
Abundant Configuration

- Plug & Play, EPT Switching under 10ms
- Compatible with Lead acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AGC Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Low cost and high efficiency: Recommended solar inverter types ...

Generally speaking, the rated power of the inverter should be slightly larger than the rated power of the water pump to cope with the instantaneous high current demand when ...
