

# **Is it recommended to install solar photovoltaic panels**

## Overview

---

Is my home suitable for solar panels?

Before deciding to install a solar system, your home should meet several criteria. A few must-haves for solar power are: your roof is in good condition, the initial cost fits your budget, and your roof gets adequate sunlight.

Should you install solar panels yourself?

You can install solar panels yourself, but doing it alone involves risks—especially when working against a deadline. Incentives can drastically lower your overall cost, but solar is still a big investment. To save money, it's no surprise that many homeowners consider a DIY approach.

Can solar panels be installed on a roof?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your roof are also important factors to consider.

Do I need a new roof for my solar project?

Before installing solar panels, your roof should be inspected to determine if it can withstand the weight. If your roof needs replacement within the next five years, it's recommended to do so before installing solar panels. Otherwise, a new roof is not necessary for a solar project.

Is a DIY solar panel installation a good idea?

A DIY solar panel installation is not the best option if you still rely on utility energy, which most people do. Installing solar panels without the proper expertise can lead to major issues that may cost you more in the long run.

When is a roof replacement necessary before solar panel installation?

Generally, roofs less than 10 years old won't need replacement first. If protect your home, consider scheduling a roof inspection by a trusted roofing company before installing solar panels. Even if you're going to , it's comforting to have the go-ahead nod from a roofing pro.
