

# **Japanese 100kw off-grid inverter**

## Overview

---

What is a 100 kW solar power inverter?

This solar power inverter with low frequency 50Hz/ 60Hz, 100kW high power output rating, no battery storage system, transforms 480V DC to 400V/ 460V AC (input and output voltage are customizable), high efficiency and stable performance. 100 kW off grid pv inverter is widely used in CNC machine, emergency car and compressor.

What is off grid PV inverter?

Off grid pv inverter is designed to withstand a variety of environmental conditions and provide reliable performance over time. Two kinds of start modes: Step-down voltage start and variable frequency start. Customers can set start mode according to the type of their load. The output voltage can be set between -40 % to +20 % of the rated voltage.

What is a 10kW on-grid inverter?

A 10kW on-grid inverter is specially designed to add extra electricity to your system. It generates enough electricity to meet your daytime needs and saves excess electricity for later use at nighttime.
