

Jordan 48v inverter 220v

Overview

What is a 230V solar inverter?

This is a multifunctional 230V off grid solar inverter, integrated with a MPPT solar charge controller, a high frequency pure sine wave inverter and a UPS function module in one machine, which is perfect for off grid backup power and self-consumption applications. This Hybrid inverter can work with 48V battery or without batteries.

What is a 220 volt solar inverter?

This single-phase 220V solar inverter is an international version Which can be used in 220Vac single phase systems and as well as in 120V/240V split phase systems. This inverter charge can be connected to a separate 240V to 120/240 Volt split phase transformer (doesn't included) to get two separate 120V hot lines for 120V loads.

What is a pure sine wave inverter?

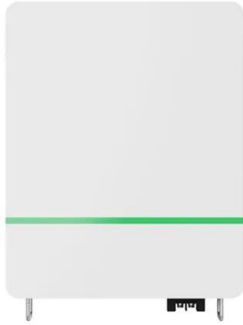

Efficient 6.2kW pure sine wave inverter enables seamless bi-directional conversion between 220V DC and 48V AC power, achieving up to 95% efficiency. It guarantees compatibility with the grid, solar panels, and generators. Customize input voltage range and battery charging current through the LCD setting for optimal performance.

What are the features of DC to AC inverter?

DC to AC Inverter Feature 1 Inverter high frequency design, high power density, high efficiency, low no-load loss. 2 Pure sine wave output, adapt any types of loads. 3 Battery charge and discharge voltage parameters adjustable,suitable for different types of batteries,can prolong the life of the battery and improve system performance.
