

Latvian new energy storage prices

Overview

The average energy storage battery cost in Latvia ranges from €400 to €1,200 per kWh, depending on technology, capacity, and application. Let's explore the factors influencing these prices: 1. Battery Technology Lithium-ion: €600–€1,200/kWh (high efficiency, long lifespan). Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Does Latvia have a natural gas storage facility?

Latvia's large underground Inčukalns natural gas storage facility has proven instrumental in bolstering regional security of supply across the region following a ban on Russian gas imports in 2022.

Are new wind farms a good investment for Latvia's energy security?

I am pleased that the bar has been set high for developers of new wind farms, which also plays an important role in the context of Latvia's energy security," said Climate and Energy Minister of Latvia, Kaspars Melnis. Given the total investment in the project, the OP Corporate Bank provided loan financing.
