Overview

Does a battery storage system need a warranty?

A battery storage system is a decades-long investment that a warranty can help protect. The less power your system stores, the more your home may need to draw from the utility company, which eats into your savings. A good warranty ensures that if your battery experiences a problem, that it will be replaced and your investment will be protected.

Which battery storage system has the strongest warranty?

Comparisons should focus on product warranty terms, end of warranty capacity, labor warranty terms, and transferability. Based on our ranking system, SolaX Power has the strongest overall warranty. Why are battery warranties important?

How long does a battery warranty last?

A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery. Battery warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

Does a battery warranty cover labor costs?

Does a battery Installer have a warranty?

Most battery manufacturers leave workmanship (labor) warranties to the installer. Still, like labor and shipping costs, some companies offer an extra safeguard by tacking on their own workmanship warranty coverage. When applicable, it's typically only an option if you work with specific installers in a manufacturer's certified network.

What is an end-of-warranty capacity rating?

In addition to providing a warranty for a set number of years, cycles, or throughput, battery manufacturers also typically offer an end-of-warranty capacity rating. This guarantees that your battery will hold a certain amount of capacity throughout the warranty.
