

Maldives makes photovoltaic inverters

- ✓ 100KW/174KWh
- ✓ Parallel up-to 3sets
- ✓ IP Grade 54
- ✓ EMS AND BMS

Overview

What is the Maldives solar project?

The Maldives solar project is a 36 MW solar power project and 50 MWh of battery energy storage solutions development across various islands in the Maldives. It also includes grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

Why solar PV with storage in Maldives?

Solar PV with storage has proven suitable and competitive for Maldives' high penetration of renewable energy (POISED type B projects), with an average fuel savings of 25%. The concept design of hybrid systems (efficient diesel generators + solar PV plants + energy storage) has resulted in success for Maldives.

Is Maldives ready for hybrid solar PV-diesel?

Maldives aims to transform the energy systems of at least 160 islands from diesel-based to hybrid solar PV-diesel systems through the Preparing Outer Islands for Sustainable Energy Development (POISED) project, which was established in 2014 with the support of the Asian Development Bank (ADB). The project focuses on the implementation of hybrid solar PV-diesel systems.

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in

sustainable projects in the Maldives.

When will the Aspire project start in the Maldives?

The inauguration of the 5 MW solar project on December 7, 2022 under the ASPIRE project has been a game changer in the energy transition journey of the Maldives .

Maldives makes photovoltaic inverters

[Why the Maldives 5 MW solar project is a game changer](#)

Moving from a fossil-based to a renewable-based energy model is the best way to make electricity cheaper for everyone, reduce the fiscal risks, ...
