

Monocrystalline double-glass 530 modules

Overview

Where can I buy a 530W solar module?

Buy your I'M SOLAR 530W solar module from the I'M STRONG series at the best price online only. The I'M SOLAR modules are the only double glass modules with a 30-year warranty. The new generation with double glass has a front with a black background. The 2 glass panes enclose the monocrystalline cells.

What is a 530W glass-glass solar panel?

Dual-glass panel: I'M SOLAR 530W glass-glass have solar cells TOPCON-technologie enclosed between two identical thick glass plies which protect them against extreme weather conditions and increase service life. High efficiency: These glass-glass solar panels produce more kWh than standard solar panels.

Are I'm solar 530W glass-glass panels safe?

Total protection: I'M SOLAR 530W glass-glass panels offer a complete protection for all possible cases. They are protected against ammonia exposure and can be used for installations on farms or on agricultural buildings. I'M SOLAR solar panels are also treated against salt corrosion.

What is a double glass panel?

The new generation with double glass has a front with a black background. The 2 glass panes enclose the monocrystalline cells. Thanks to this high-tech technology, the PID effect is eliminated. The lifetime of the panel is designed for at least 50 years. Glass is a better heat conductor than plastic (material used in standard panels).

Why should you choose I'm solar double glass panels?

The I'M SOLAR double glass panel is robust, powerful and of high quality. Glass is a better heat conductor than plastic (material used on standard

panels). These panels operate at lower temperatures and increase your electricity production. The I'M SOLAR glass panels are robust, efficient and qualitative.

How long do I'm solar 530W glass-glass panels last?

The aging test evaluates the panels' service life at 50 years minimum. Total protection: I'M SOLAR 530W glass-glass panels offer a complete protection for all possible cases. They are protected against ammonia exposure and can be used for installations on farms or on agricultural buildings.
